

SETTING UP THE MACHINE

Ask for the help of an experienced and qualified technician while setting up the machine.

1-) Fundamental Plan of the Machine

Four holes (Refer to the drawing below) Dia.15mm

2-) Instructions

For an effective machine, the position and the base of the machine are important. Be careful on these points while placing the machine:

- The machine must be placed on a flat, preferably cement base. To fix the machine use bolts.
- There must be plenty of room all around the machine for easy working.
- The machine height is ideal for any workingman.
- There must be plenty of Light on top of the machine
