

## Meyer Belt Grinder

The metal removal rate of the Meyer belt grinding machines is phenomenal. The grinding power is over fifteen times that of traditional stone grinders. These powerful machines can radius heavy plate and bar in one operation, avoiding the need to crop or burn the required profile prior to 'dressing'. A 50mm radius in 12mm steel plate is achieved in 10seconds. They have an endless variety of applications for fabricators, blacksmiths and many others in the metalworking industry.

### Machine Features

- Brake Motor
- Extremely powerful grinding performance
- Highly rigid construction
- Quick change belt system
- Adjustable working height
- Available in 3" and 6" belt widths
- Eye protection
- Emergency stop button
- Dust collection box

### Optional Equipment

- Dust Collection Bag
- Double Extraction System

### TECHNICAL SPECIFICATIONS

MODEL		Meyer 75	Meyer 150
STOCK CODE			
Motor	kW	3	3.6
Belt Speed	m/s	37	37
Belt Size	mm	75 x 2,000	150 x 2,000
Length	mm	1,000	1,000
Width	mm	460	520
Height	mm	1,000	1,000
Weight	kg	85	115
